Description

A Potent Superfood

[Read the full product profile for Alfalfa and Barley Grass Juice Extract powders](#)

Alfalfa grass is thought to be the world's richest land plant mineral source. Its roots can grow up to 100 feet deep into the soil, pulling in minerals that other plants cannot reach. Alfalfa is noted for its rich levels of potassium, calcium, magnesium, phosphorus, zinc, iron, silicon, copper, selenium, and many other trace elements. It is also a rich source of almost all the known vitamins, including vitamin K, and is high in protein, flavonoids, and alkaloids. Alfalfa is often recommended for inflammatory conditions such as arthritis and rheumatism and has beneficial effects on digestion, ulcerated conditions, and the maintenance of friendly intestinal

flora. Its cooling effect is found helpful in reducing fevers. It works to both cleanse and alkalize the body.

Alfalfa has a high chlorophyll content, significant for many healing properties including blood building and purification. Chlorophyll is to plants what hemoglobin is to our blood. It is actually very similar to the heme molecule of hemoglobin. Because of this, chlorophyll has many health benefits, including improving anemic conditions as well as detoxifying and purifying the blood and liver. When ingested as a food nutrient, chlorophyll actually increases blood production, as it readily changes into the heme molecule of hemoglobin. Additionally, chlorophyll aids in the wound healing process soothes ulcerated tissue and is an antibacterial agent.

Alfalfa grass juice extract is a potent concentrate superfood. It is truly a nutritive tonic; in its essence, sweet and pure light energy. Our **Alfalfa grass juice extract** is produced using a state-of-the-art, low temperature, spray-dry process that preserves its natural vitamins, minerals, and other rich nutrients. The whole plant is literally juiced, thereby concentrating it, and then dried. It is 100% cold-pressed pure alfalfa grass juice at an extract concentration of 21:1 and is enzyme-rich. Because of the superior nutrient profile of our alfalfa juice extract, it is one of the key ingredients of our Supremely Green superfood.
